

1. New Features & Enhancements

Feature	Description
Mobile Navigation	Full-featured menus now available on the mobile site, improving usability across all devices.
Additional Pages	• Image Generator – Free AI image creation. • Audio Generator – Free audio synthesis. • Megathread – Curated collection of cracked games. • Movies – Stream movies and TV shows directly from the site.
Discord Integration	Users can purchase and unlock new Discord roles through the website. Six new “Badge-Hunter” roles are now available.
Store Launch	The online store is officially live, offering a growing range of digital products and services.
Performance Optimisation	Site load times have been significantly reduced while maintaining visual fidelity.
New Services	Introduction of Open-VR FSR support for enhanced VR experiences.
Visual Refresh	Complete redesign of the main website layout and theme.
Deprecated Pages	Legacy pages remain accessible but are marked as “services disabled.”
Google Forms & AI Updates	Updated form integration and upgraded AI generation modules.

2. Bug Fixes

- Fixed navigation loops that previously required a page reload.
- Resolved mobile menu rendering issues.
- Corrected color-contrast problems in submenu text for better readability.
- Eliminated infinite loading on the portfolio section; now loads within standard time limits.
- Optimised media compression to reduce lag on older hardware.
- Resolved multiple colour palette inconsistencies across the site.

3. Redesigns & Deprecations

Page	Status
Home	Redesigned – new layout and content hierarchy.
Profile	Redesigned – streamlined user information display.
Portfolio	Redesigned – improved navigation and media handling.
Call of Duty	Deprecated – functionality removed; page retained for legacy access only.

4. Roadmap – What’s Planned for 2026

1. **Text-to-Video Generator** – AI tool to convert scripts into video content.
2. **Image-to-Video Generator** – Create short videos from image sequences.
3. **Community-Driven Custom Configs** – Social posts and forum features for sharing EQ settings and custom configurations.
4. **Long-Term Performance Optimisation** – Continued work on speed, caching, and scalability.
5. **Expanded Store Catalogue** – Add more digital products and exclusive offers.
6. **Additional Free Services** – Further AI utilities and community tools.
